PERU .- A correspondent of the Tri bune writes as follows in regard to the effect of Falb's predictions of an earth-quake on the 28th or 30th of September: From the very first of September families began to move away from Callao. Lima was one grand processions of carts, creaking under their weight of goods and furniture, and resembled New York on May Day. Families moved up to Lima from Callao to escape the ca, and out of Lima to the neighboring towns, plantations, and even the open pampas or fields, to escape the coming earthquake, Merchants even sent their goods away, whole blocks of streets were closed, and nothing was to be seen in the streets once so full of life and fashion but the ponderous-wheeled carts and the poor half-starved mules, toiling under their heavy loads. The 28th came in clear and sunshiny. You could walk entire streets in Callao, and not meet a solitary human being not, even a dog; and even the turkey buzzard, taking the alar m, had fled, to find other pickings. Bolted doors and closed window shutters were visible on every side, and Goldsmith's 'Deserted Village' found its description here. In Lima, the churches

were open all day, and crowds knelt in the dim aisles while a solemn mass was sung. Business was at a stand-still. On the night of the 28th, nearly all the Peruvians slept in hastily-constructed tents and booths out in the open fields, away from the sounding sea, which really on that evening did seem to send forth a deeper diapasion than usual. It was a night of alarms, but alarms only Theives were buey, although the police force was doubled to watch over the clos ed and deserted buildings. No earthquake occurred, but the people said "We shall have it on the 30th."

quake occurred, but the people said "We shall have it on the 30th."

The night of the 30th, at sundown, all the stores were closed. There were hardly five people in the streets. I saw one colitary woman welking with her husband, who was the victim of all eyes, as if her temerity was without a parallel. The train of cars that came up to Lima from. Callao was crowded with fugitives. All night long people field on foot to the open fields. O e subject only was the general theme: 'As we escaped so well in August total destruction, our time has come now, and Lima and Callao will doubtless be laid in ashes and ruins.' It was a night of general horror and gloom. No one slept, yer Lima seemed Nike a city of the dead. The 30th passed; no earthquake. But on the night of the 2d of October, at twelve, midnight, a hardearthquake shock, followed by two lighter ones, doing no damage, however, occurred. or School, followed by two lighter ones, doing no damage, however, occurred. The believers in Falb were reassured. It looked ominous, 'Beware of the 5th of Cobor,' was the general cry. The cities and towns up and down the coast were deserted. The captains of ships lying in Callae Bay, and at the Chincha and Guanapa Islands, were all in a state of uncasiness, and kept their vessels ready to put to sea at a moments of since the state of the stat

their vessels ready to put to sea at a moment's notice.

The morning of the 5th dawned, and the sea was never so smooth, and the sir never more balmy and delightful. The day wore out, night fell; nothing had happened. Old Ocean slept as calmly as a lake, and justified her good name. The people are flocking back to their deserted homes by scores, and popular indignation has taken the place of superstition. On all sides is heard denunciations against Falb, and he has already been hung in efficy at Bella Vista. A prominent Paruvian banker told me that no pesora & uldestimate the amount of suffering Falb had caused the poorer classes here alone, to say nothing of the rich, who could afford the expense of moving but felt all the inconvenience. He said that he personally knew many poor families whose ignorance caused them to sell and sacrifice all their furniture, their last bed, the very shirt from off their backs, so get the means to move out into the open country, where they were still living, often without shelter or food, and unable to get

CAMOMILEPILLS

Thursday Morning, Dec. 9, 1869. The Telegraph. A few years ago an American Telegraph Company pushed their line West from San Francisco to the confines of British Columbia, and, under the provisions of an Ordinance framed for that purpose by our Legislature, through the colony to New Westminster, thence of folly as inexplicable as it would cervature to the colony to New Westminster, thence of folly as inexplicable as it would cervature to the colony to New Westminster, thence of the colony to New Westminster, the New Westminster, the colony to New Westminster, the visions of an Ordinance framed for that to Quesnelmouth, and north as far as Tatla Lake. A branch was also constructed to Victoria, the junction being Swinomish, W. T.; and, more recently, a branch was constructed from Queselmouth to Barkerville, and another from New Westminster to Burrard Inlet. With the exception of the two last mentioned branches the entire work was carried through with foreign capital and at the sole expense of the company. It will scarcely be necessary to state that the work was not originally intended as a least one; but it was margin a part of the work was not originally intended as a local one; but it was merely a part of a great scheme of girdling the globe, a scheme abandoned upon the successful spanning of the Atlantic. The abandonement of the greater scheme left this work in the position of a local line, and as such it has been maintained and worked at considerable loss to the company up to the present. Tired at length of an enterprise involving a considerable annual deficit and presenting little prospect of early improvement, the company now some before the Colonial prospect of early improvement, the com-pany now come before the Colonial Government with a definite proposition; and it is with that we now proposition; and it is with that we now propose to deal. Although to a great extent in the dark as to the precise details of the proposition placed before the Executive, yet we venture to think that we shall be enabled to state the main features of it with sufficient accuracy for present purposes. The proposition of the company may be regarded as being substantially this: The whole of the line within the colony, excepting the branch from Swinomish to Victoria, to be given over to the Government, together with all the instruments, appliances and material, free of charge; the Government to transfer to the line between here and Portland the annual subsidy of \$4,500 Portland the annual studies of expose paid to the colonial line last year; the company to grant the Government the free use of their line connecting Victoria with the Mainland; and also the right of free transmission of all official dispatches over their line to San Francisco. First, let us regard the proposi-tion from a purely business and colonial standpoint. The line from New West minster to Quesnelmouth is 460 miles in length, and that from New Westmisster to the junction at Swinomish is 75 miles in length. Under present conditions it would cost, on an average, \$250 a mile to construct and equip the line. a mile to constitute and equipment of the more. At \$250 a mile the line which it is proposed to surrender to the colony represents a present cash value of \$118,750. But, what is it worth to the colony? It can, in the present state of things, be maintained at an annual outlay of about \$5,000 in excess of receipts. It is presumable that \$5,000 a year is not an outlay of the colony to any in exorbitant sum for the colony to pay in order to secure the advantages of telegraphic communication from the sea-board to the most remote settlement. A single emergency might at any time arise in which the telegraph might be worth more to the colony than that sum And then, one cannot assume that there will be no progress. Every year must mark some advancement; and the tele-graph must, year by year, become more used and less unremunerative. the telegraph might be so in connection with the Postal Department as to render it a great public good. Thus, confining the view entirely within the colony, we can-not think the Government would be justified in permitting the country to be deprived of its telegraphic system, when an annual expenditure of \$5,000 would suffice to avert such a retrogressive step,—a step, be it remembered, involving not alone the suspension of telegraphic communication, but the total abandonment and loss of property which, for telegraphic purposes, repre sents a cash valued of, say \$120,000, -for to cease to maintain the telegraph even for a season is, hardly say, to incur the loss of it. Need we stop here to point out the influence abandonment would have upon any future enterprise of the kind? It was no small matter to be placed in posses-sion of a complete telegraphic system at so early a stage in the history of the colony, not only without being called upon to contribute a single dollar, but, on the contrary, enjoying the advan-tages of the expenditure of upwards of \$150,000, of foreign capital in the establishment of that system, and of a large annual expenditure in maintaining But, let that enterprise be wholly abandoned now, and we shall have to wait a long time for capitalists to construct another telegraphic system. Re-garding Confederation as being close at hand and remembering that trans-continental telegraphic communication through British territory is an indespensable item in that great scheme of empire, let us look at this line of which we have been speaking as a section of the trans-continental telegraphic system It is no small matter to be in a position to tell the Canadian Government that this colony already possesses its own section of the inter-oceanic line; nor would it be a trifling consideration that we should thus be enabled, in negotiating terms of union, to include in the as-

sets of British Columbia an item of

Of course the line would in due time, be assumed and maintained by the Federal Government. Viewing the tubject in the two-fold aspect in which we have thus briefly endeavoured which we have thus briefly endeavoured to present it, surely no two opinions can possibly exist as to the dury of the Government. To permit such a disaster as the deprivation of our telegraphic system and the abandon ment and total loss of so valuable a property when a triffing temporary agree. of folly as inexplicable as it would cer-tainly be inexcusable. It will be ob-served that we have confined our re-marks chifley to the portion of the tel-egraphic system which the company propose handing over to the Govern-ment. That port of the proposition which applies to the line connecting Vancouver Island with the Mainland, and the whole with the rest of the world. and the whole with the rest of the world, may be considered as resting upon its own bottom. An annual subsidy of \$4,500 is not a high price at which to retain these connections, to say nothing about the privilige of transmitting free of charge all Government messages over the whole distance to San Francisco. We believe the proposition of the Tele-Short Handed.

Short Handed.

(EDITOR BRITISH CLONIST: — I wish to call the attention of Insurance Agents and others connected with the shipping interest to the fact of the British bark Medora, Cart. I H Joste, having sailed a few days ago from Sooke bound to Valparaiso with only a crew of seven persons, consisting of the captain, two mates, two apprentice boys, a carpenter and one seaman! Imagine a vessel of 357 tons register going to sea in the depth of winter with only one man before the mast! It was not because he could not get men; he could have had a full crew at \$40 per month, but he would not have them. He deceived the Custom House authorities by saying he had his complement, he having counted his boys as A B seamen.

This statement is strictly correct, for I had it from the Pilot who was in charge of the vessel when she left Sooke.

THE CROWN HOTEL FIRE-ARREST OF THE PROPRIETOR AND HIS BARMAN ON SUSPICION OF INCENDIARISM. - Yesterday afternoon Mr Pemberton proceeded to Esquimalt to hold an inquest into the circumstances attending the late destructive fire at the Crown Hotel. A jury was empanneled and several witnesses examined, the evidence of nearly all of whom examined, the structure of the horizontal pointed directly to the destruction of the hotel as the act of incondaries. Furniture, carpets and antimacassars, thoroughly saturated with coal oil, were produced. Some of those articles were taken from the room in which the fire originated and from rooms remote from it. It was proved that two eans of coal oil had lately been brought from Victoria for Thomas Tugwell, the proprietor, and that when the fire broke out Wm Young, Tugwell's barman, showed great iodiffeence and apathy. Mr H Cox, a boarder at the hotel, and a servantman, deposed to hearing spysterious movements about the house late at night, and a noise as if some person was cutting through a partition and removing laths and plaster. It was shown that there was very little stock or furniture in the hotel belonging to Tugwell. He was insured for \$700. Most of the furniture in the hotel be-\$700. Most of the furniture in the holel belonged to Mrs Cox, who was absent at the
time of the fire and was uninsured. This
lady also deposed that in a box beneath her
bed she left silver plate and jewelry, valued
at \$1000, the box was produced before the
Coroner—it was empty and had evidently
been nified of its contents before the fire. Mr
H E Wilby swore that he had been impressed for some days with the belief that a
fire would break out at Tuzwell's, and that pressed for some days with the center that he fore would break out at Tugwell's, and that before proceeding to the sale of Tugwell's property on the Lequimalt Road—which sale was in progress when the fire broke out—he told his wife that should a fire occur during his absence to send a messenger to him or horseback. The jury returned a verdict to the effect that the fire was the work of an incue ensor that the fire was the work of an incendiary, and lespector of Police Bowden immediately arrested Wm Young, as principal, and Thomas Tugwell as accessory before the fact. They were lodged in prison last night.

THE RED 'WAR.'-We have further advices from Red River by the arrival of the Active. It is quite true that Fort Garry was captured by 60 half-breeds, while everyone was at dinner. No resistance to the insurgents' demands was offered, who have confiscated ell the aminunition at the Fort. It is said a young Irish priest, a Fenian, formented the re ellion. The commander is one Louis Reil. A republican form of government has been instituted, and six chiefs of powerful tribes have given in their adherence to the rebel government. As late as November 30th, Governor McDougall and staff were lying at Pembina. The necounts from which we call these particuders are American. The Canadian papers, on the other hand, regard the retellion as a very small affair, which will be settled without bloodshed. Active. It is quite true that Fort Garry

SEVERAL of the London papers had their articles on Lord Derby in type before he died, and some of them printed obituity no tices in advance. The Emperor then referred to the Senalus Consultum of September last, which he said he had proposed with the purpose of inaugurating a new era of conciliation and progress.
It is always the task of the Chambers to

aid him in carrying out the plan. He proceeded to enumerate municipal reforms which will be made. He pronounced the situation of the country satisfactory, and declaired moreover that he was ready to grant reforms more decided. He would maintain the principles of the constitution. The relations of France with foreign powers were friendly. Sovereign and people are desirous

The Emperor continued as follows : We land; Bishops are meeting at Rome for wise and conciliatory purposes; progress, and science draw nations closer to each other, while America unites the Atlantic and the Pacific. Everywhere capital and intelli-Pacific. Everywhere capital and interna-gence combine to connect by electric wires all the nations. France and Italy will soon be joined by a tunnel through the Alps-The Stuez canal has already united the Med-iterranean and Red sea. The Empress was present because I desired her to testify the sympathy of France with the wonderful genius and preserverance of a Frenchman. The Emperor concludes with the following words: 'Messieure, you resume your labors after an unusual interruption of the session. I hope the bodies of State will apply legally the modifications lately made in the constitution. There is to be more in the constitution. There is to be more direct participation of the nation in its own affairs. This will be a new force for the empire. May the Chambers prove that, without falling into excess, France can support free institutions which honor a civilized

nation.?
The Journal (efficial) this evening praises the Emperor's speech. The opposition press complain that the Emperor does not promise

complain that the Emperor does not promise the reforms France needs.

The following is a synopsis of reform promised in the Emperor's speech. The Mayors to be chosen by the municipalities Municipal authorities are to be elected by universal sufferage; communal councils to be established and fresh prerogatives to be granted to conseil guarant. The colonies granted to conseil guereaux,—the colonics to participate in the movement. Universal sufferage to be extended, A more rap d de-velopment of primary education. Diminu-tion of costs of justice and reduction of the war tax on succession, The Savings Bank system to be extended. More humane regula-tions to be made regarding the labor of children. Increase of small selaries in public cflices, and useful measures connected with agriculture are promised. An inqui into the excise, and also a project of a la regarding customs duties.

Red River Rebellion.

TORONTO, Dec 1—A special from St Paul says late Red River advices say a convention assembled at Fort Garry, Nov 17th, to discuss the following propositions—First, a compromise with Gov McDougall, Second, an independent Republic. Third, annexation to the United States. Fourth, a colony under Great Britain. Fifth, return to the Hudson Bay Company rule. So far the French half-breeds only have taken up arms. Fidelity of the Empress Eugenie.

The special correspondent of the Paris Figaro writes from Constantinople that when the Empress was leaving, one of her maids was attacked with typhus fever, and that a bed was made up for her in the saloon of the Agile. the Sultan coming on bond to take leave of the Empress, her Majesty apologized for receiving him on deck, and said she could not take him to the saloon because there was an invalid there. After the Sultan left the Empress went to watch by the bedside of the sick serwatch by the bedshed of the side server, but just as the yacht got under weigh the Turkish ships in the port began to fire a salute. She then rushed upon deck, and entreated that signals should be made to cease the firing. Finding it impossible to make her wishes understood in time by the Tarkish fleet, the care orders to put on all steam, and she gave orders to put on all steam, and sne gave orders to pur ou all steam, and get out of the noise as soon as possible. The poor servant died shortly after wards and her body was sent ashore in the Dardanelles to be transported to

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption. Cough, Bronchitis, Asthma, and Consumption.

Probably never before in the whole history of medicine, has anything won so widely and so deeply upon the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a love series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throut, have made it known as a reliable protector against them. While adapted in the control of the lungs and throut, have made it known as a reliable protector against them. While adapted in the control of the lungs and through the control of the lungs and the provided the consumption, and the dangerous affections of the throat and lungs. As a provision against sudden attacks of Croup, it should be kept on hand in every family, and indeed as all should be provided with this antidote for them. Although settled Consumption is thought incurable, still great numbers of cases where the discuss escender attack, have been complete to declarate the part of the Lungs and Throat, that the most obstants of them yield to it. When nothing else could reach them, under the Cherry Pectoral they subside and disappear.

Singers and Public Speakers find great protection from it.

Singers and Public Speakers find great pro-ction from it. Astlima is always relieved and often wholly Astima is always remerciants of the cured by it.

Bronchitts is generally cured by taking the Cherry Pectoral in small and frequent doses.

So generally are its virtues known that we need not publish the certificates of them here, or do more than assure the public that its qualities are fully maintained.

Ayer's Ague Cure, For Fover and Ague, Intermittent Fever, Chill Fever, Remittent Fever, Dumb Ague, Periodical or Billous Fever, &c., and indeed all the affections which arise from malarious, marsh, or miasmatic poisons.

As its name implies, it does Cure, and does not fail. Containing neither Arsenic, Quinine, Bismuth, Ziuc, nor any other mineral or poisonous substance whatever, it in movise injures any patient. The number and importance of its cures in the ague districts, are iterally beyond account, and we believe without a parallel in the history of Ague medicine. Our pride is gratified by the acknowledgments we receive of the radical cures effected in obstinate cases, and where other remedies had wholly failed. Unacclimated persons, either resident in, or ravelling through minamate localities, will be prejected by taking the AGUE CURE daily. Of the Liver into healthy activity. For Bilious Disorders and Liver Complaints, it is an excellent remedy, producing many truly remarkable cures, where other medicines had failed. Prepared by Dr. J. C. Aven & Co. DR. J. COLLIA BROWNE'S CHI ORODYNE.—Extraction "Medical Times," January 12, 1866.—"Is prescribed by secres of orthodox medical practitioners. Of course it would not be thus singularly popular did it not "supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most octain remedy in Coughs, Colds, Asthma, Consumption, Neuralgia, likeumatism, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE —Extract from the General Board of Health, London as to its efficacy in cholora. "So strongly are we convinced of the memose value of this remody that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., inte inspector of Hospitals, Bombay: "Chlorodyne is a most valuable remedy in Neuralgia, asthma and Dyscutery. To it I fairly own my restoration to health after eighteen months' sovere suffering, and when all other medicines had failed."

It is necessary to ware the public against sourious imitations, which only bear the pirated rame, and are deficient of the true properties of the only genuine, viz. DR. J. COLLIS BROWNE'S, as was proved before Vice-Chancellor's W. P. Wood, in the Court of Chancellor's Erowne vs. Freeman, when the Vice-Chancellor stated that the stony of Freeman being the Inventor was DKHRRATEHY UNTRUE.
